

BELL ASIA SERVICE CENTER OVERVIEW

LESS DOWN TIME. MORE AIR TIME.

Bell's customer service and support in the Asia Pacific region is more comprehensive than ever before. We've been in Asia since the 1970s, with a sales and supply facility based in Singapore. As the demand for global aftermarket support increased, it became clear that our Asia Pacific presence needed to grow as well. Collaborating with our sister company, Textron Aviation, we opened a fully equipped service center in Singapore in 2012.

This state-of-the-art facility expanded our capabilities within the region, allowing us to offer customization and completion work, major refurbishment projects, labor and part sales, maintenance, repairs, complete overhauls, and maintenance training.
